PROFESSIONAL SUMMARY

BS Computer Science student with a strong passion for frontend web development. I build responsive, well-designed websites with HTML and CSS, and I am steadily growing my JavaScript and UI design skills through hands-on, real-world projects. My goal is to become a skilled frontend developer and contribute to meaningful web applications.

TECHNICAL SKILLS

Web: HTML5, CSS3, Responsive Web Design, Flexbox

Design: Figma, UI Design, UI/UX (basic)

Tools: Git, GitHub, VS Code

Programming: C++, JavaScript (learning)

Other: Electronics hobbyist

PROJECTS

Mysteries of Ancient Egypt Live site

- Built a multi-page website with pages for pyramids, pharaohs, mysteries, gallery and timeline.
- Designed a video hero section, statistics section and newsletter sign-up area with consistent navigation.
- Technologies: HTML5, CSS3.

Spider-Man Fan Website Live site

- Created a responsive one-page website with a hero banner, about section, powers cards and image gallery.
- Used smooth in-page navigation and a bold visual style to practise layout and styling.
- Technologies: HTML5, CSS3.

Automatic Car Decision System GitHub

- Developed a system in which a car makes driving decisions automatically.
